For Quranic Studies
TABYIN

«Tabyin for Quranic Studies» is a quarterly Peer-Reviewed scientific periodical magazine, issued by «Baratha Center for Studies and Research» in Beirut and Baghdad. It is concerned with approaching contemporary intellectual issues and challenges from a Qur'anic approach, and aims to root contemporary issues from a Qur'anic perspective, and to spread Qur'anic culture.

The journal adopts an Open Access policy, making all its content freely available online immediately upon publication, without financial or legal restrictions. All materials are published under the Creative Commons Attribution 4.0 International License (CC BY 4.0), which permits unrestricted reading, downloading, use, redistribution, and republication, provided that proper attribution is given to the original source.

Scientific Body

- Dr. Abbas Al-Fahham: Qur'an Rhetoric – Iraq.
- Dr. Hassan Reda: Education – Lebanon.
- Dr. Mabrouk Zad Al-Khair: Islamic Studies – Algeria.
- Dr. Mohammad Reda Haji Esmaili: Qur'an Studies – Iran.
- Dr. Iqbal Najm Wafi: Qur'an Sciences – Iraq.
- Dr. Jassem Mohamad ali alghorabi: : Interpretation and Qur'an Sciences – AlKufa Uni.Iraq
- Dr. Mounir Ben Jamour: Jurisprudence and its Sciences – Tunisia.
- Dr. Mohammad Kazem Rahman Staish: Qur'anic Sciences – Iran.
- Eng . Dr. Talal Faiq Al Kamali: Interpretation and Qur'an Sciences – Iraq.

Editorial board (alphabetical order)

- Eng. Dr. Asaad Abdul Razzaq Al-Asadi: Sharia and Islamic Sciences – Iraq.
- Sheikh. Dr. Jawad Riad: Jurisprudence and its Sciences – Egypt.
- Dr. Hassan Kadhim Asad: Interpretation and Qur'an Sciences – Iraq.
- DR. Iubnan Alzein: Qur'an and hadith – Almustafa Uni.- Lebanon).
- Eng. Dr. Hakim Salman Al-Sultani: Qur'an Sciences – Iraq.
- Eng. Ali Banayan Asfahani: Sciences of Qur'an and Hadith – Iran.
- Dr. qaed Abdelmotaleb Alfaham (Interpretation and Qur'an Sciences- Iraq.
- Eng. Dr. Leka Jawad Al-Kaabi: Sciences of Qur'an and Hadith – Iraq.
- Eng. Mohammad Reda Sotoudehnia: Sciences of Qur'an and Hadith - Iran.

« Tabyin » Magazine Publishing Terms

- Published research and studies do not necessarily express the opinion of the magazine.
- When the research is accepted, the author undertakes to transfer the ownership copyrights of the research to the magazine, and not to publish it in any other magazine, except after obtaining written approval from the magazine›s management. The magazine has the right to publish the research in a collective book; and if the researcher wants to publish his research in any paper, or electronic publishing medium, he must obtain prior written approval from the magazine›s management.
- The magazine is committed to inform the author of the approval to publish the research without modification, or according to specific modifications based on the comments of the evaluators, or apologizing for not publishing within a period not exceeding (30) days, except in the case of early writing (asking the author to write a sample to know his method), but the author is informed of that.
- If the research is rejected, the magazine has the right to inform the author of the reasons for rejection, or not to inform him of that.
- The arrangement of research (articles) within the magazine is subject to technical purposes, and has nothing to do with the status and fame of the author (researcher).
- The magazine management pays a financial reward for each research published in the magazine, and informs him - in advance- of its value, or how the calculation is done.
- Correspondence should be sent to the Editor-in-Chief: Dr. Ammar Abd al-Razzaq al-Sagheer at the following addresses:
- Phone number: 009647800441489 Email: tabyin.magazine@gmail.com Web: Tabyin.barathacenter.com

Tabyin Magazine Publishing Ethics

- The magazine's administration is committed to protecting the authors' intellectual property rights.
- The magazine's administration adheres to the principle of non-discrimination based on race or gender, basing the evaluation and analysis of ideas and topics on the standards of scientific thought and rigorous research methodologies.
- The magazine's administration maintains strict confidentiality throughout the peer-review process; the identities of reviewers are not disclosed to authors, nor are the identities of authors disclosed to reviewers, access to such information is restricted to the Editor-in-Chief and the editorial board.
- The magazine is committed to respecting the intellectual property rights associated with translated research.
- Research submissions must adhere to standards of academic integrity and the ethics of scientific research.
- Research must not have been previously published in a magazine or book, nor derived from an academic thesis; furthermore, it must not be currently pending publication or simultaneously submitted to another entity.

Using Artificial Intelligence Tools ,

- The magazine regards artificial intelligence tools as aids for researchers within limited scopes, provided they do not compromise the originality of the research or replace the scholarly and intellectual effort undertaken by the author. Accordingly, the magazine adopts the following standards:

A. Acceptable Use Limits:

- Authors are permitted to use artificial intelligence tools for supporting tasks that do not constitute the core of the scholarly contribution, such as proofreading, refining phrasing, suggesting linguistic alternatives, organizing or reordering ideas, and initial translation (provided the output is reviewed and verified for accuracy), as well as suggesting keywords or preliminary research avenues. In all these cases, it is

required that the idea, argument, analysis, formulation of the problem, derivation of conclusions, and critical stance remain the author's own work.

B. Unacceptable Use

- The magazine does not accept research papers, in which the scientific content, whether in whole or in substantial part, has been generated using artificial intelligence tools, even if the author has subsequently made linguistic or stylistic revisions. This applies to the use of such tools for drafting sections, constructing analyses and arguments, drawing conclusions, or formulating the scholarly discussions that constitute the core of the researcher's contribution. It is also prohibited to use artificial intelligence to generate text that implies it is the product of the researcher's own intellectual effort or critical analysis, when the intellectual content was actually produced by those tools.

C. Sources, References, and Citations

- Artificial intelligence tools are not considered reliable scholarly sources for substantiating or documenting information. Researchers are responsible for consulting the original sources and independently verifying the accuracy of the information, texts, quotations, references, and page numbers cited in their research. The use of references or citations generated by such tools without directly verifying the existence of the source, the accuracy of its bibliographic information, and the correspondence of the citation to the material quoted is also prohibited. Fabricated or unverifiable citations constitute a breach of the principles of academic integrity, regardless of whether they result from the use of artificial intelligence tools or any other means.

D. Author's Responsibility

- The author bears full scholarly and ethical responsibility for all parts of their research; the use of artificial intelligence tools does not, under any circumstances, absolve the author of this responsibility. This responsibility encompasses ensuring the accuracy of information, the correctness of citations and references, the originality of ideas and analyses, and the protection of intellectual property rights, as well as ensuring the research is free from plagiarism, fabrication, or falsification.

- Furthermore, authorship may not be attributed to an artificial intelligence tool, nor may such a tool be listed among the authors, as it lacks the legal or ethical capacity to bear the responsibilities associated with scientific publication.

E. Disclosure of Use

- If the use of artificial intelligence goes beyond proofreading or minor stylistic improvements, the author must disclose the nature of such use and the specific tool employed, while identifying the sections where it was utilized in accordance with the magazine's controls. Such disclosure does not imply acceptance of all forms of use; the research remains subject to the magazine's standards regarding originality and intellectual independence.

F. The Magazine's Right to Verify

- The magazine reserves the right to request clarifications from the author regarding the research methodology or the use of artificial intelligence tools therein, as well as to request whatever is necessary to verify the originality of the scholarly material or the accuracy of sources and references, should there be substantive grounds for doing so. It does not rely solely on the results of AI-generated text detection tools as conclusive evidence; rather, it treats these indicators as part of the editorial and scientific verification process, evaluating them based on the totality of available evidence.

I. Acknowledgment of Responsibility

- Submitting a research to the magazine constitutes an acknowledgment by the author that any use of artificial intelligence tools, if applicable, has adhered to the limits permitted by this policy, and that the core scientific and intellectual content is the product of their own work and effort.
- The author bears sole and full responsibility for any violation resulting from the use of these tools, whether discovered during the review and editing stages or after publication. The magazine reserves the right to take appropriate action in accordance with its editorial policies and publication ethics, including rejecting the research, requesting revisions, or retracting it after publication, should a significant violation be established.

Tabyin Magazine Evaluators Guide

- The scientific evaluator› main task is to read the research submitted for publishing, which is within his scientific specialization, with great care, and evaluate it according to a scientific and academic vision and perspective that is not subject to any personal opinions, then put his constructive and honest observations regarding the research sent to him.
- Before starting the evaluation process, the evaluator ensures whether the research sent to him is within his scientific specialization or not. If the research is within his scientific specialization, he should estimate that he has enough time to complete the evaluation process; since the evaluation process should not exceed fifteen days.
- After the evaluator agrees to fulfill the evaluation process, and completes it within the specified period, he is committed to fulfill it according to the following determinants:

    A. Determine the extent of scientific integrity of the research.

    B. Determine the extent of conformity between the title and the content of the research.

    C. Determine the extent of clarity of the research abstract.

    D. Determine the extent of the research introduction clarification to the research idea.

    E. Determine the extent to which the introduction of the research clarifies its idea.

    F. Determine the extent of suitability and coherence of the subtitles.

    G. Determine the extent of the scientific level of the research.

    H. Determine the extent of the linguistic and literary level.

    I. Determine the extent of the value of the sources and the accuracy of relying on them.

    J. Determine the extent of the research importance and authenticity, in terms of mechanism and results.

    K. Determine the extent of the research size.

    L. Determine the extent of the research suitability for publishing.

    M. Determine, accurately, the paragraphs that need to be modified by the researcher.

- The evaluator determines the reasons for rejection, if he decides that the research is not suitable for publishing.
- The evaluation process is conducted confidentially.
- If the first evaluator wants to discuss the research with the second evaluator, he must inform the editor-in-chief.
- The scientific evaluator's comments on the research are sent to the editor-in-chief to be sent to the researcher if any, so that the author can take them into consideration for approval of publishing, without the evaluator and the researcher knowing each other.
- The evaluators' comments and recommendations are relied upon in the decision to approve the publishing of the research or not.

Tabyin Magazine Authors Guide

- The research must be new in its presentation, and no one has previously addressed the subject, using the same mechanism and reached the same results. It must be characterized by depth, analysis and criticism.
- The research must be free of linguistic and typographical mistakes, and punctuation marks must be taken into account when writing.

Title Selection, Planning Phase:

- The author selects a title from the list of topics specified for the issue.
- The author submits a general outline of the research within 15 days of the date the title is agreed upon.
- In the preliminary outline, the author takes into account the general themes defined in the magazine's editorial policy.
- The Managing Editor determines the required word count, aiming for approximately 5,000 words (±1,000), based on the scope of the topic and in accordance with academic and methodological requirements, as well as the magazine's editorial policy objectives.

Writing, Conducting Phase:

- The author and the managing editor coordinate regarding the timeframe for completing the article.

- The author must promptly notify the managing editor if he/she is unable to write the article for any reason.
- The managing editor periodically contacts the author to check on the progress of the article.

Evaluation, Modification Phase:

- The research paper is subject to screening using the "Plagiarism Check X" software to ensure that the plagiarism rate does not exceed the established limit (25%). The article, whether in text or content, in whole or in part, must not have been previously published or submitted for publication elsewhere. The plagiarism rate must not exceed 25% of the total word count of the main text.
- The research paper is subject to review by the Editorial Board regarding methodology, content, and formatting.
- The Managing Editor forwards the Editorial Board's comments to the author.
- The author is required to incorporate the necessary modifications based on the comments provided.
- The author must complete the required modifications within a period not exceeding one week.

Methodological, Content Controls:

- The author must adhere to the Center's general intellectual direction, as well as its academic controls and policies published on the official website.
- The article must demonstrate originality and innovation, linguistic accuracy, and high-quality writing.
- The author should use clear, accessible language, avoiding overly convoluted phrasing or unnecessarily complex terminology, without compromising academic rigor; the article should be written in a clear, scholarly manner with a smooth, straightforward style free from complexity or ambiguity.
- 4. The author must rely on high-quality scholarly sources and reliable research references.

Referencing Guidelines:

- The Center employs a citation system using abbreviated footnotes accompanied by a complete bibliography for all books and research papers
- All footnotes are abbreviated from the very first citation; the initial citation is not provided in full form before being abbreviated in subsequent instances.
- The footnote includes author's name, book title, volume number (if applicable), and page number.
- (Example: Muhammad Husayn Tabataba'i: 'Al-Mizan fi Tafsir al-Qur'an', Vol. 2, p. 145.)
- Details regarding the editor, translator, publisher, place of publication, edition number, or year of publication are not included in the footnote.
- Phrases such as "ibid" (the same source) or similar expressions are not used; instead, the citation is rewritten as it appeared previously, with adjustments made to the volume or page number if they have changed.
- Full bibliographic details for references and sources are listed in a separate section at the end of the book. (Example: Mohammad Husayn Tabataba'i: 'Al-Mizan fi Tafsir al-Qur'an', Dar al-Ta'aruf, 2nd ed., Beirut, 1998.)
- f. For verbatim quotations, the text is enclosed in quotation marks ("..."), followed by the abbreviated footnote for citation.
- When paraphrasing (conveying the meaning), the same citation format is used, preceded by the word "See".
- The author cites sources in the page footnote. Sources are inserted automatically using the "Insert Footnote" feature in Microsoft Word, ensuring the text direction is set to right-to-left for Arabic writing, and left-to-right for footnotes in languages other than Arabic or Persian.
- Write Quranic verses with full diacritics and standard Quranic brackets; cite the verses from the Holy Quran and place them in the main text immediately following the citation, for example: {cooperate in righteousness and piety} [Al-Ma'idah, verse: 2].
- Hadiths are cited in the footnotes, including the book title, chapter, and Hadith number; for example: (Mohammad ibn Ya'qub al-Kulayni: Al-Kafi, Vol. 1, p. 34, Book of Intellect and Ignorance, Chapter on the Reward of the Scholar and the Learner, Hadith 3).
- The author enclose proper names in parentheses; for non-Arab names,

provide both the Arabic and English forms within a single set of parentheses upon their first mention in the research (e.g., [Mohammad Husayn Tabataba'i], [Henry Corbin]...); provide a brief biographical note in the footnote upon the first mention of the name (where necessary).

- The author reviews and verifies the detailed bibliographic information for sources and references cited in both the footnotes and the bibliography.

Organization, Structure

- The author must include the following information on the first page of the paper: the main title and subtitle; the author's name accompanied by a footnote detailing their academic credentials (nationality, academic degree or qualification, and institutional affiliation); an abstract of 150 words; and 5 to 10 keywords, depending on the paper's content.
- Sections and themes should be organized using a sequential format (e.g., First, Second, Third, etc.), ensuring a logical, methodological progression and avoiding unsubstantiated conclusions.
- The styles feature in Microsoft Word must be used for formatting headings and section titles.

Editing

- 1. The paper must be typed using Microsoft Word, adhering to the following specifications:
    - For Arabic text, use the "Simplified Arabic" font, size 14 for the main body and size 12 for footnotes.
    - For English text, use the "Times New Roman" font, size 14 for the main body and size 12 for footnotes.
    - Numerals must be written using the Eastern Arabic numeral system. (1 - 2 - 3 - 4...).

Using Artificial Intelligence Tools

- The magazine permits authors to use artificial intelligence (AI) tools for tasks that support the research process, such as proofreading, refining phrasing, preliminary translation, and organizing material and ideas.

However, these tools must not be used to generate the research's core scientific content, write its sections or subsections, or produce its analyses, arguments, and results in a manner that allows the tool to replace the researcher in the author ship process. The author bears full responsibility for all information, text, quotations, references, and citations included in the research and is committed to verifying them against their original sources. References or citations suggested by AI tools may not be used without directly verifying their accuracy.

- The magazine reserves the right to request clarification regarding the nature of the use of such tools when necessary and to take appropriate editorial action if it is determined that their use exceeded the scope of assistance to include the generation of scientific material or author ship on the researcher's behalf.

Author Declaration

- The author must include the following declaration in a footnote linked to the research title: "I declare that the use of artificial intelligence tools in the preparation of this research, if any, was limited to supporting tasks and did not extend to the generation of its scientific content, analyses, or results. I assume full scholarly and ethical responsibility for all material contained herein, including the accuracy of information, quotations, references, and citations."

Declaration on the Researcher s Use Limits of Artificial Intelligence

I, the undersigned: .....

Author of the research entitled: .....

.....

I hereby declare that the use of artificial intelligence tools in the preparation of this research, if any, was limited to supporting tasks and did not extend to the generation of its scientific content, analyses, or results I bear full academic and ethical responsibility for all the content herein, including the accuracy of the information, quotations, references, and citations.

The Qur'anic Vision in Imam Khamenei's Thought (QS): Methodology, Explanation, Application

Magazine Message:

1 - Returning to Holy Qur'an and confirming the authority of its verses in addressing the issues of the contemporary nation.

2 - Spreading Qur'anic culture on a large scale and linking the nation to its Holy Book (Qur'an) to overcome leaving the Qur'an cognitively.

3 - Emphasizing the ability of Holy Qur'an to revive the spirit and renew effectiveness in the mind and conscience of the nation to achieve the desired renaissance.

4 - Consolidating the authority of Ahl al-Bayt (Prophet Family) (peace be upon him) in understanding and interpreting the Qur'an based on the Hadith of al-Thaqalayn (statement attributed to the Islamic prophet Mohammad, that introduces the Qur'an), due to the importance of this in paving the way for the promised Mahdist society.

Nations, When Read Through Their Destinies

Editor-in-Chief:
◆ **Dr. Mohammad Mahmoud Mortada**

The death of nations is a philosophical issue before it is a historical fact. Questioning the fate of human groups puts the mind before the problem of the «reasonableness of history»: Is the path of nations subject to a rational law, or does it take place without order, tossed around by coincidences and the balance of power? In this context, the Holy Qur›an presents a philosophical thesis par excellence, as it sees history as a path governed by fixed laws that transcend people and times in the rise and fall of nations: {**you will never find in the way of Allah any change, and you will never find in the way of Allah any alteration**.}[Fatir, verse: 43].

The concept of Sunnah [divine law] establishes a principle that elevates history to the status of a science, rendering the destinies of nations a subject open to comprehension and inductive analysis, governed by the logic of causality. Here, the Sunnah functions as an objective law operating with a consistency akin to the immutable and necessary laws of nature, distinct from moral exhortation that merely addresses the conscience. What befell the ancients befalls those who follow their path; the fate that struck bygone nations strikes those who emulate them. The Qur›an ‹s extensive recounting of the histories of past peoples serves this very purpose: stories are reiterated to anchor principles, narratives are repeated to crystallize into laws, and specific instances are revisited to reveal the overarching principles governing them. These laws operate with absolute impartiality across all nations, regardless of their creeds; the law applies to anyone who meets its criteria, without favoritism. Mere adherence to the «truth» in belief holds no sway unless coupled with justice in action. Thus, the study of these historical laws acquires objective rigor, transcending the realm of moral preaching to attain the status of law.

****

This thesis presents a conception of the nation as an autonomous entity; it leads a life of its own and possesses a collective will that emerges from the interaction of its individuals, transcending their mere numerical aggregate, while being structured by a system of values and relationships that fuse it into a unified whole. Furthermore, it has a finite lifespan, marking the conclusion of its civilizational existence: {to every people is a term appointed: when their term is reached, not an hour can they cause delay, nor can they advance.} [Al-A›raf, verse: 34]. An individual is born and dies within a brief lifespan, whereas a nation spans successive generations, moving through a cycle of emergence, maturation, and decline. This distinction between individual time and national time establishes a philosophy that views the community as a civilizational entity possessing its own logic of life and death. This perspective reveals the true scope of «ruin»: the death of a civilization precedes physical desolation, and internal decline anticipates the destruction of stone and mortar. The nation, first, loses its unifying spirit. Then it does its material edifice crumble, reflecting the decay that has already taken hold within.

At the heart of this logic, lies a moral cause that operates within the course of history much like a cause producing its effect; the Qur›an establishes that injustice is an active force driving the collapse of civilization, a genuine cause that inevitably precipitates its consequence, as stated in the Almighty›s words: {And your Lord would not have destroyed the cities unjustly while their people were reformers.} [Hud, verse: 117]. Consider the precision of this formulation: destruction is linked to the state of the people within their social collective, and the criterion for survival is the rectitude of dealings and the social order. The town, characterized by reform survives, whereas one where injustice runs rampant incurs a civilizational reckoning. In essence, injustice is the misplacement of things and a disruption of the balance of relationships, a state where the vulnerable are humiliated, those in power transgress the law, and rights are squandered. In this worldview, the legislative order is inextricably linked to the cosmic order of creation; justice is a universal law that preserves social equilibrium, while injustice is an assault on that balance, triggering the reaction Allah, Almighty, has embedded within the very structure of civilization. When this imbalance becomes acute, the bonds underpinning society unravel, and the dysfunction accumulates within its fabric until the threshold of collapse is reached. Thus, desolate ruins transform into a meaningful sign: {So those are their houses, desolate because of the wrong they did; indeed in that is a sign for

a people who know.} [Al-Naml, verse: 52]. The ruin becomes a sign can read it, and the letter (b), in the Arabic word (bimazalamu), which means, «because of the wrong they did», firmly binds the consequence to its cause.

****

At this point, the difference between this philosophy and the materialist interpretation of history becomes clear. The latter attributes the rise and fall of civilizations solely to factors of power and economics. This interpretation remains superficial, merely observing the movement of wealth, weapons, and urban development, and then taking these as the ultimate cause. The Qur›an, however, penetrates to the core that drives this surface, establishing destiny on a value-based foundation that governs both economics and power. Wealth is a tool, by which society is improved or corrupted, and power is a means by which justice is established or tyranny is spread. Moral values determine the direction of these tools. Therefore, whoever reduces civilization to its economics and power is confusing cause and effect, mistaking the effect for the cause. Material factors are merely the arena for the manifestation of moral action, which alone is the true cause of survival or demise.

This conception distinguishes between the instrument of destruction and its cause. The Qur›an mentions various physical means that were inflicted upon past nations, such as the violent wind, the cry, the earthquake, and the drowning, and attributes them all to a single moral cause, as in the Almighty's saying: {So We seized each of them for their sin; and among them were those upon whom We sent a storm of stones, and among them were those who were seized by the cry, and among them were those whom We caused the earth to swallow up, and among them were those whom We drowned. And Allah would not have wronged them, but they were wronging themselves.} [Al-Ankabut, verse: 40]. The atural causes are instruments for carrying out divine decree, while the underlying cause remains the people›s own injustice towards themselves. Thus, destruction in the Qur›an is distinguished from blind natural disasters; for although the physical event appears the same, its meaning is determined by the moral cause that brought it about. The nation creates the cause of its own demise, and then the instrument of its destruction comes to it, of the same nature as its own actions.

The Qur›an identifies the actor who practices injustice in the path of decline, which is a class that swells in the body of the nation and monopolizes wealth and influence, and turns prosperity into arrogance that disrupts justice. Allah Almighty

says: {And when We intend to destroy a city, We command its affluent but they defiantly disobey therein; so the word comes into effect upon it, and We destroy it with destruction.} [Al-Isra, verse: 16].

The luxury is a condition that afflicts the elite when their privilege becomes detached from their responsibilities, giving rise to a consciousness that views this privilege as a natural right and the subjugation of others as an inevitable fate. At this stage, society loses its ability to correct its course because the very group entrusted with reform is the one benefiting from corruption. Thus, the mechanisms of self-correction are disabled, and the decline continues to its ultimate end. Perhaps the clearest example is found in the people of ‹Ad, as Allah Almighty says: {As for ‹Aad, they were arrogant upon the earth without right and said, «Who is greater than us in strength?» Did they not consider that Allah who created them was greater than them in strength? However, they were rejecting Our signs.} [Fussilat, verse: 15]. The material power has been transformed in their consciousness into evidence of superiority, and civilization into a pretext for tyranny, until they submitted to those who led them to their doom: {And they followed the command of every stubborn tyrant} [Hud, verse: 59].

When internal reform fails, Allah, Almighty sends messengers as an external mechanism of correction, alerting the nation to its downfall before it is too late. The message here is part of Allah›s established order and law, not an event outside of it. Civilizational punishment is delayed until the warning reaches its full extent and the proof is established against the people, in accordance with Allah›s words: {And We would not punish [a people] until We had sent a messenger}. In this condition, the justice of the divine order is manifested; the nation is not held accountable for negligence without warning, nor is it destroyed before it has the opportunity to return. The messenger›s mission lies in restoring the lost standard to the collective consciousness, exposing the accumulated injustice that has been mistaken for justice, and calling both the oppressed and the affluent to a single scale. The nation›s response to this call determines its fate. It is either a response that opens the door to salvation, or a rejection that completes the conditions for destruction.

The Qur›an reveals the centers of resistance to reform within the structure of the nation. The arrogant elite, those with prestige and wealth surrounding the ruling power, stand against the messengers in defense of a system that preserves their privileges. Allah Almighty says: {the arrogant elite among his people said to those who were oppressed, to those of them who believed} [Al-A›raf, verse: 75]. The clash

here is between a reformist project seeking to restore order and entrenched interests that thrive on the imbalance of power. These elites possess the tools to influence collective consciousness, portraying the call to reform as a threat to the existing order and inciting tribalism against the advocates of justice. When the elite prevail over the voice of reform, the nation closes the last avenues for rectification, thus completing the conditions for its downfall.

The tyranny reaches its political zenith in the example of Pharaoh, as the verse describing him encapsulates the elements of decline in a single pattern. The verse states: {Indeed, Pharaoh exalted himself in the land and divided its people into factions, oppressing a group among them} [Al-Qasas, verse: 4]. This exaltation elevates the ruler above all measure, followed by a fragmentation that tears the nation›s unity into warring factions, culminating in the subjugation of a particular group. Dividing society is an inherent tool of tyranny. A unified nation possesses the capacity for resistance and reform, while a fragmented nation is easily manipulated, and weakened by internal conflicts. The Qur›an concludes its description of Pharaoh with a statement that encapsulates his fate: Allah Almighty says, {Indeed, he was one of the corrupters.} [Al-Qasas, verse: 4]. Power built upon the disintegration of the social fabric and the subjugation of a segment of society carries within it the seeds of its own destruction. Pharaoh's fate in the Qur›an is the most eloquent testament to the fact that arrogance necessitates eradication. The Qur›an links the downfall of Pharaoh to the law of the oppressed inheriting power, making the collapse of the oppressive regime a prelude to empowering those it had subjugated. Allah Almighty says: {And We wanted to confer favor upon those who were oppressed in the land and make them leaders and make them inheritors} [Al-Qasas: 5]. In this view, history moves toward restoring justice; oppression is a temporary state imposed by tyranny, while inheritance is the consequence for those who uphold the truth. The fall of Pharaoh and the empowerment of the oppressed are two sides of the same coin, whereby the scales of injustice are overturned and replaced by the scales of justice. Thus, the scene of destruction is completed in its positive dimension, for the demise of the oppressors is the gateway to a new era of prosperity established by those who inherit the land after a long period of oppression, and an opportunity to resume building upon a foundation of justice.

The injustice also has an economic dimension, which the Qur›an highlights in the story of Madyan. The Prophet Shu›ayb›s (peace be upon him) call to his people puts his finger on the crux of the matter: {And O my people! give just measure and weight,

nor withhold from the people the things that are their due: commit not evil in the land with intent to do mischief.} [Hud, verse: 85]. Here, the scales symbolize justice in exchange, and depriving people of their rights represents a systematic theft of their labors, seeping in through rigged scales to undermine the very fabric of society.

The Holy Qur›an links cheating in weights and measures with corruption on earth, making economic fraud a crime that undermines the foundations of civilization, as it destroys the trust upon which human society is built. Similarly, nations turn against their blessings through ingratitude, transforming the very means of their survival into the causes of their destruction, as in the verse: {And Allah presents an example: a city which was safe and secure, its provision coming to it in abundance from every location, but it denied the favors of Allah. So Allah made it taste the envelopment of hunger and fear for what they had been doing.} [Al-Nahl, verse: 112].

Here, security turns into fear, and satiety into hunger and the concluding statement affirms people›s direct responsibility for their fate. This connection between human behavior and the corruption of their environment rises to become a universal law. As the Almighty says: {the corruption has appeared throughout the land and sea by what the hands of people have earned} [Al-Rum, verse: 41]. Thus, the disorder of the external world is but a mirror reflecting the corruption of the moral world.

These facts bring to light a major philosophical dilemma: the relationship between the inevitability of law and human freedom. The divine law is described as immutable; comparable to the laws of nature, and its being described as «unchangeable» suggests a rigid determinism. Yet, the Qur›an makes its application contingent upon human free will. Allah Almighty says in His Holy Book: {Indeed, Allah does not change the condition

of people until they change what is in themselves} [Al-Ra›d, verse: 11]. Herein lies the solution: the law is inevitable in its outcomes, but its premises depend on human choice. What nations willingly sow, justice or injustice, they will inevitably reap, rise or fall. Peoples hold the reins of beginnings, while fate determines the ends. Thus, the rigor of the law and human agency converge in a single structure, liberating history from both blind determinism and arbitrariness, and transforming it into a realm of human responsibility for collective destiny. The predetermined lifespan of a nation is not a fate imposed from outside its will, but rather the inevitable consequence of its own free will instigating the causes of its demise.

The place where destinies are decided lies within the very core of a nation›s consciousness. The placement of the phrase «what is in themselves» before «the

condition of people» in the verse carries a profound philosophical significance. For moral structure and collective consciousness are the foundation of historical development, and apparent transformation is merely a delayed consequence of a profound shift. The corruption begins in perception when society views injustice as justice and oppression as a natural fate. It then permeates the will, extinguishing the desire for reform, and finally settles in behavior, eroding the very structure from within.

The nation is defeated in its consciousness before it is defeated in its physical arena, and its unifying values crumble before its physical walls. This order establishes consciousness as the origin of historical existence, and the world of meaning as the foundation of the world of civilization. It places the key to advancement, as well as the key to decline, in the depths where convictions are forged and wills are shaped.

From this principle springs the foundation of responsibility that binds the nation to its shared destiny, as in the Almighty›s words: ﴿And fear a trial, which will not strike exclusively those of you who have wronged﴾ [Al-Anfal, verse: 25]. The civilizational retribution becomes widespread when injustice escalates and those capable of preventing it remain silent. A society that allows the oppressor to manipulate its balance, and ignores the violation of rights and the fragmentation of unity, participates in shaping its own destiny. Silence in the face of corruption is a form of acceptance, and acceptance places those who remain silent within the circle of responsibility. At this point, the issue transcends individual considerations and becomes a matter of national concern. Upholding justice becomes a collective duty that protects everyone from shared consequences and makes resisting injustice a prerequisite for the continuation of civilization.

This perspective presents a clear paradox: oppressive nations may endure for a long time, growing stronger and wealthier even at the height of their tyranny. However, the Qur›an resolves this paradox through the concepts of «respite» and «gradual leading astray.» It presents the delay of punishment as a stage in divine law: ﴿We only extend it for them so that they may increase in sin﴾ [Al Imran, verse: 178], and the verse: ﴿We will progressively lead them to destruction from where they do not know.﴾ [Al-A›raf: 182]. The outward appearance of history may obscure its true course; continuous prosperity may be perceived as an ascent when, in essence, it is a gradual decline. Thus, the outward appearance of a civilization differs from its inner reality, and decline may appear as flourishing until its conditions are met and its consequences are realized. A period of respite is an opportunity that can be

regressed or exploited; a nation that utilizes it for reform survives, while one that uses it to perpetuate its oppression accumulates the causes of its downfall under a deceptive calm. In this way, the understanding of the law becomes consistent with the persistence of oppressors, and thought is freed from linking the cause to its immediate moment.

The law of destruction is countered by an upward law, which operates in the opposite direction and with the same inevitability. The nation that reforms itself opens the doors to growth and blessings, as in the verse: {And if only the people of the cities had believed and feared Allah, We would have opened upon them blessings from the heaven and the earth.} [Al-A›raf, verse: 96]. This law operates in both directions, upward and downward, according to the degree of justice or injustice that a nation cultivates within itself. Faith and piety in this verse are social practices that preserve balance and cultivate potential, and blessings are a result of this preservation, manifesting in prosperity, sustenance, and security. Thus, the law of natural laws is freed from its threatening nature, becoming a call that awakens the will. Those who possess the power to corrupt also possess the power to reform, and those who deserve destruction through their injustice deserve survival through their justice.

The Qur›an links the law of destruction with a third law that balances it on a historical scale. The fall of a nation paves the way for the rise of another to succeed it, ensuring that civilization remains in a state of continuous renewal: {And how many a city We have destroyed which was unjust, and raised up after it another people" [Al-Anbiya: 11]. Destruction is a punishment for the oppressors, while the rise of a new people is an opportunity granted to their successors. The new people inherit both the land and the trials, and they face the same choice: a civilization built on justice that endures, or one built on injustice that perishes. Thus, destruction becomes part of a broader cycle in which the earth renews its inhabitants, and every nation is given its chance to shape its destiny, while this law remains a powerful force governing the rise and fall of nations.

The Qur›an crowns this philosophy with a parallel epistemological approach. The call, to travel the earth and observe the fates of nations, is not merely a recording of history. Rather, it is a transformation of it from narrated accounts into deduced laws, and from scattered details into comprehensive principles, as in the verse: {Similar situations [as yours] have passed on before you, so proceed throughout the earth and observe how was the end of those who denied.} [Al Imran, verse:

137]. Here, travel is an intellectual act that reads history in geography, extracts from the outcomes of nations rules that govern destinies, and elevates inductive reasoning from isolated incidents to governing principles. Allah Almighty says: { Allah destroyed over them, and for the disbelievers is something comparable.} [Mohammad, verse: 10]. This law extends to everyone who fulfills its conditions. The fate is repeated with the repetition of its causes, and the rule applies to the present as it applied to the past, so that the awareness of nations of their past becomes a tool for reading their present and anticipating their future.

These elements combine to form a coherent philosophy, which concern the fall of nations. They are a fixed law governing destinies; a nation with will and a lifespan; a moral imperative centered on justice and injustice; human freedom choosing the path; a collective consciousness representing the ground of transformation; a message establishing proof and warning of danger; divine respite determining the course of history; and a collective responsibility encompassing the entire nation. These elements are organized into a vision that makes history a rational field governed by laws, placing humanity in the position of the agent responsible for the fate of its community. This philosophy does not merely interpret the past but seeks to cultivate an awareness of the present. Those who understand these laws can discern their position on the trajectory of rise or fall and possess the tools to correct their course before reaching the point of no return. The Qur›an presents this vision as practical knowledge that guides action and transcends theoretical contemplation, transforming the examination of nations› fates into an insight that safeguards civilization.

This reading transforms the theme of the demise of nations into a mirror reflecting the present. A society where class injustice is rampant, luxury swells to the point of obstructing justice, and the balance of rights is disrupted, follows the same path that destroyed bygone nations, even if the manifestations of ruin have shifted from a collapse of public trust to an erosion of legitimacy or the depletion of resources. The injustice in our time has taken on new forms, as controlling collective consciousness and manufacturing convictions has become a field for extending influence and stifling reform, in a manner comparable to what the arrogant elite did when they incited their people›s tribalism against advocates of justice. The nation whose consciousness is suppressed, whose balance of rights is disrupted, and whose destiny is dictated by the affluent, has fulfilled the conditions for its demise, even if it appears outwardly strong and prosperous. Reading the present, according to

the standards of the Qur›an, gives the nation a scale, by which to weigh its health against its sickness. It reveals to it its approach to the brink of collapse before it is too late, so that it has the opportunity to correct itself as long as the door of grace is open; for the scale is one in every time and place: justice prolongs the civilizational life, and injustice hastens the end.

Therefore, we begin this issue with a study of the laws of decline in the Holy Qur›an, which includes the following research topics:

The «Focus» studies dealt with:

- «History in the Holy Qur›an: From Event›s Logic to Laws› Logic» by Sheikh (Hussein Mahmoud Kawtharani) (Lebanon).
- «Civilizational Rise›s Conditions in the Qur›an: From Mankind to Civilization: Objective Reading of Construction, Empowerment Laws», by (Dr. Abdullah M. Badawi) (Lebanon).
- «Fall Begins from Within: Analytical Qur›anic Study of Internal Structure of Civilizations, Societies Collapse», which does Sheikh Mahmoud Ali Saraib (Lebanon) masterfully undertake.
- «Analytical Study of Cognitive Structure of Qur›anic Narratives, Their Impact on Shaping Civilizational Awareness», by (Dr. Ali Sahib al-Jassani) (Iraq).
- The section of «Qur›anic studies and research» is dedicated to explain:
- «Requirements of Qur›anic Research in the Perspective of Ayatollah Khamenei (QR),» by (Dr. Zahra Akhawan Moghaddam) (Iran), which is translated by (Dr. Mohammad Firas al-Halabawi) (Syria).
- In conclusion, you will find «Reviewing a book»: «Rise, Fall of Civilizations from the Holy Qur›an›s Perspective» by Sheikh (Mohammad Baqir Haidar) (Lebanon).

We hope that this issue will contribute to establish a conscious Qur›anic reading that redirects the discussion towards values, liberates man from closed narratives, and establishes a civilizational awareness that makes the Qur'an a source of guidance in a troubled world, in accordance with the Almighty's saying: {Indeed, this Qur›an guides to that which is most upright.} [Al-Isra, verse: 9].

Allah is the One who grants success to the straight path.

History in the Holy Qur'an
From Event's Logic to Laws' Logic

◆ **Sheikh Hussein Mahmoud Kawtharani**

A Lebanese seminary student of religious sciences at the advanced Kharij level, studying at Al-Mustafa International University in the holy city of Qom.

■ Abstract

This article begins with the premise that the Holy Qur'an does not simply transport the reader from one event to another, but rather from event to precedent; that is, from specific occurrences to the underlying principles that govern them. Therefore, chronological order and historical details are not the central focus of the Qur'anic discourse; the aim is not to reconstruct the past exactly as it happened, but to cultivate an awareness that comprehends the recurring patterns of history.

In this context, this article seeks to reread history in the Qur'an as a tool for understanding, demonstrating how the Qur'anic past becomes a mirror through which humanity can envision its present and future. From the Qur'anic perspective, history is a human experience that highlights that injustice, arrogance, reform, and faith are not merely moral values, but active forces that shape the destinies of societies and guide their course. From this standpoint, the shift from the logic of events to the logic of divine laws transforms humanity's view of history, making it a field for understanding and responsibility, not simply a memory of past events.

Civilizational Rise's Conditions in the Qur'an: From Mankind to Civilization

Objective Reading of Construction, Empowerment Laws

◆ **Dr. Abdullah M. Badawi**
PhD in Islamic Studies, head of Esnad Center for Studies and Research.

■ Abstract

This research examines the conditions for civilizational advancement in the Holy Qur'an as a constructive system that begins with the individual and culminates in development and empowerment. It stems from a central question: What conditions does the Qur'an stipulate for the emergence of a rising and sustainable civilization?

The research employs a thematic interpretation methodology, conceptual analysis, and a systematic approach, drawing upon Imami commentaries, hadith sources, and contemporary Quranic studies. It concludes that civilizational advancement is not achieved through material power alone, but rather through the development of the honored and entrusted human being, linking action to justice, trustworthiness, responsibility, and consultation, while distinguishing between divinely ordained empowerment and fleeting success. Thus, the research presents a constructive Quranic reading of the laws of development, establishing that sound development is the fruit of the convergence of guidance, action, and values in human life, and establishing a criterion that governs the vision of advancement from within the Quranic text itself, not from outside it.

Fall Begins from Within
Analytical Qur'anic Study of Internal Structure of Civilizations, Societies Collapse

◆ **Sheikh Mahmoud Ali Saraib**

Lebanese writer, Holding a Master's degree in Jurisprudence and Principles from Al-Mustafa University (PBUH) - Qom, and a Master's degree in Philosophy and Theology from Azad University.

■ Abstract

This research examines the phenomenon of civilizational decline in light of the Qur'anic perspective on historical and social laws. It proceeds from the premise that the Holy Qur'an does not interpret the collapse of a civilization as a random event or an external consequence; rather, it views it as an internal process originating in a shift within the psychological and value-based makeup of the individual and the community. The study examines the relationship between internal change, corruption, decadence, arrogance, injustice, and civilizational replacement, viewing them as interconnected links within a Qur'anic law that explains the collapse of civilizations from within, prior to their defeat from without. The study employs a thematic exegetical approach and an analysis of historical laws (sunan), drawing upon the writings of the martyr Sayyid Mohammad Baqir al-Sadr regarding historical laws and the inner human dimension; Allameh Tabataba'i's interpretation of the relationship between actions and events; and Sheikh Mohsen Araki's exposition of Qur'anic social laws. It also incorporates civilizational insights from Ibn Khaldun, Malek Bennabi, and Abdelwahab El-Messiri. The study concludes that civilizational decline begins with an internal shift in the human psyche and a disruption of the value system; this subsequently manifests as corruption, decadence, arrogance, and injustice, ultimately culminating in civilizational replacement and the nation's loss of its role in the course of history.

Analytical Study of Cognitive Structure of Qur'anic Narratives, Their Impact on Shaping Civilizational Awareness

◆ **Dr. Ali Sahib al-Jassani**

Iraqi writer, holding PhD in Comparative Exegesis, and professor at the University of Kufa's Center for Studies.

Abstract

This study examines the pivotal role of Quranic narratives in shaping the civilizational consciousness of contemporary humanity, transcending mere historical storytelling to reach broader horizons, specifically, the extraction of the divine laws governing the rise and fall of nations. The philosophical framework of these narratives rests on four integrated dimensions: the cognitive dimension, for deriving universal principles; the behavioral dimension, for providing models worthy of emulation; the ethical dimension, for activating the conscience against materialism; and the emotional dimension, for evoking both hope and reverence. This approach seeks to liberate the human mind from the pitfalls of dependency and blind imitation, replacing them with rational proof and dispelling the illusion of inherited superiority, while reshaping civilizational standards by prioritizing value-based development and human justice over material accumulation, thereby actualizing the principle of responsible stewardship in building a promising future.

Requirements of Qur'anic Research in Perspective of Ayatollah Khamenei (QR)[1]

◆ **Dr. Zahra Akhawan-Moghaddam**

Assistant Professor, Department of Quranic Sciences, University of the Holy Quran and Its Sciences, Faculty of Quranic Sciences, Tehran.

◆ **Translated by: Dr. Mohammad Firas al-Halbawi**

PhD in Persian Language and Literature, Lecturer at Damascus University, Sworn translator.

Abstract

Understanding the objectives of Divine Revelation, from Allah Almighty, necessitates a thorough grasp of the requirements for Qur'anic inquiry and the foundations of research in this field. To address this within the intellectual and doctrinal framework of Ayatollah Khamenei (QR), this study, employing a descriptive-analytical approach and centering its analysis on the Holy Qur'an and His Eminence's own words, seeks to identify and articulate these requirements. The article answers the central question: "What are the requirements for research and inquiry into the Holy Quran?" This is by outlining a set of fundamental pillars: the Qur'anic knowledge; the centrality of the Qur'an; a return to the traditions of the Infallibles (peace be upon them) coupled with critical scrutiny; uncovering the underlying structure governing the Qur'anic text; grasping the Qur'an's progressive and transformative nature; and engaging with its inner meanings, its illuminating quality, and the cultivation of a spiritual intimacy with it, all while according due importance to Qur'anic sciences and their authoritative role.

Rise, Fall of Civilizations from the Holy Qur'an's Perspective

◆ **Reviewed by: Sheikh Mohammad Baqir Haidar**
Lebanese doctoral researcher in Quranic Studies, Al-Mustafa International University, Holy Qom.

Abstract

The book " Rise, Fall of Civilizations from the Holy Qur'an's Perspective" seeks to identify the laws governing societies and civilizations, specifically those that drive their flourishing or their collapse.

The book proceeds from a premise that emphasizes the social dimension of human life and views the movement of history through the lens of divine laws; history is not merely a collection of scattered events but a sequence of ordered occurrences whose underlying causes and governing principles can be uncovered. It examines the Qur'anic concept of "Sunnah" (divine law), elucidating the fundamental principle that governs all social laws. Furthermore, it derives from the Qur'an eight laws that lead to the fall of civilizations, contrasted with three essential keys to the development and prosperity of societies.

The book concludes by exploring the future of the world and the end of history, affirming that Qur'anic principles dictate the ultimate triumph of truth over falsehood and the eventual establishment of the rule of the oppressed, the followers of the prophets (peace be upon them).
